

SPEERSTRA FEED INGREDIENTS BV IS AN INTERNATIONAL TRADING COMPANY AND AN IMPORTER OF TOP-QUALITY ANIMAL FEED INGREDIENTS AND ADDITIVES.

We are glad to contribute towards healthy livestock and better returns for farmers. To achieve our aims, we develop innovative product concepts in partnerships with customers, suppliers and research institutes. Our products are proven by independent scientific research, and we are proud of this.

THE IDEA BEHIND PRECISION NUTRITION

By tailoring nutrition much more closely to the specific needs of various animals, health problems are much slower to develop. Feed utilisation improves as well, which helps to maximise production of milk, meat and eggs. This leads to:

- Higher profits
- Better animal welfare
- Healthier animals
- Less environmental pollution
